

# 1877 Barn

Build this printable 3-dimensional scale model of our historic barn.

It was built in 1877, at the same time of the construction of the Wellington County Poor House. It was part of the "industrial farm" complex that was designed to operate as a self-sufficient farm.

Print this PDF file 100% size, preferably on card stock. Score folds and glue-tabs first then carefully cut out the pieces.  
 Tip: pre-shape the silo cylinder around a pencil before glueing tab.  
 scale: 1:200
