

## Notice of Supplemental Report Wellington County

### Badley (Metcalf Street) Bridge Replacement/Rehabilitation Municipal Class Environmental Assessment

The County of Wellington completed a Municipal Class Environmental Assessment (Class EA) for the rehabilitation/replacement of the Badley (Metcalf Street) Bridge in 2017. This study was conducted to define a future bridge management plan for the Badley (Metcalf Street) Bridge which is nearing the end of its service life.

#### The Process

The Environmental Assessment was conducted as a Schedule C project in accordance with the Municipal Class Environmental Assessment (2015). As a Schedule C project, an Environmental Study Report (ESR) was completed and is available for review online at the County website (<http://www.wellington.ca/en/Badley-Bridge.asp>).

During the 30 day review period, a Part II Order was requested asking that the County of Wellington be required to prepare an individual environmental assessment. The Ministry of the Environment and Climate Change (now Environment, Conservation and Parks) determined an individual environmental assessment was not required; however, they did direct that additional consultation with the Ministry of Tourism, Culture and Sport, and further study to address outstanding concerns regarding cultural heritage, was required. A Supplementary Cultural Heritage Evaluation and Heritage Impact Assessment Report was prepared to fulfill the conditions imposed by the Minister of the Environment and Climate Change. The Supplementary Cultural Heritage Evaluation and Heritage Impact Assessment Report can be found online at the County website (<http://www.wellington.ca/en/Badley-Bridge.asp>).
