1.0 GPS COORDINATES FOR SITE LOCATIONS

Site locations were recorded using a Trimble GeoExplorer Global Positioning System with an accuracy of better than 1 m. A coordinate reading was taken at the limits of the site in each cardinal direction and for the centre of the site for sites that were bigger than 10 m by 10 m. One GPS recording was taken for isolated findspots. The position of fixed reference landmarks were also recorded. The sites are located within Universal Transverse Mercator Zone 17. North American Datum 1983 was used. No method of correction was used.
