

Certificate of Accuracy

Radar:

- Manufacturer: SmartMicro
- Model Number: UMRR-II Type 44
- Serial Number: 0x00045DC7

This speed measuring device has been tested and verifies to be functioning in accordance with the manufacturer's specifications.

This device has been found to make speed measurements within the prescribed limits of +/- 1 km/h or 1% (the greater of) compared to a Doppler Frequency produced by a calibrated Electronic K-band Target Simulator Doppler Generator (EKTSDG).

The speed measurement is certified accurate within the prescribed speed limits. The Doppler Frequency Generator is set to **75km/h**, and the speed measured by the radar is **74.772km/h**.

The calibration check was performed by **Chris Letcher**.
