

Attention Programme Teams

We want to hear about your
quality child care practices!

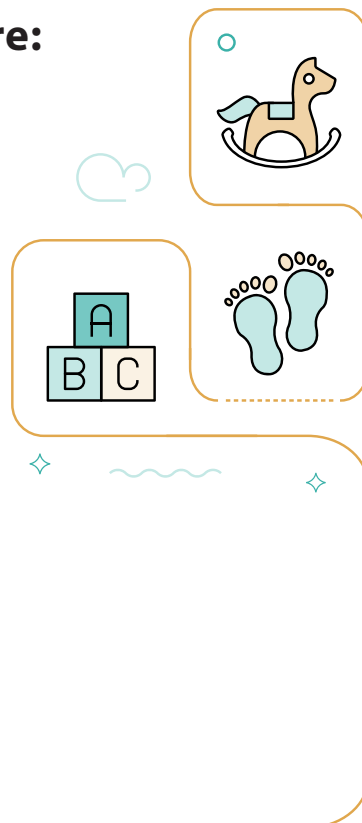

What is a Quality Child Care Programme?

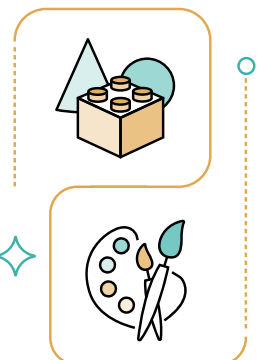

Creating conditions for children's belonging, engagement, expression, and well-being.

Questions to reflect on quality care:

- How are children experiencing this practice?
- In what ways does this practice support the children's belonging, engagement, expression, and well-being?
- If this was my first time at this programme, what would I notice?
- How is this practice reflected in our programme?
- Is this practice consistent across all areas of the programme?
- What questions do you still have about this practice?
